This controlled document is maintained under the Goodness Gardens Food Safety & Quality Management System and the PrimusGFS audit scheme. It must be reviewed at least annually, after any deviation or audit finding, and whenever processes, products, or regulations change. Printed copies are uncontrolled.

1. Purpose

Monthly GMP internal audit addendum for organic handling (NOP compliance).

2. Checklist Items

- Organic product identified and segregated from conventional at receiving, storage, production, and shipping
- No prohibited substances used on organic lines; sanitizers on the approved organic list with rinse/verification as required
- Organic integrity maintained: dedicated or cleaned-and-purged equipment with records
- Labels and lot codes preserve organic identity through traceability
- Organic certificates for suppliers current on file
- Pest control in organic areas uses approved methods only

3. Instructions

- Complete together with 1.04.01R-IA-GMP at facilities handling organic product.
