This controlled document is maintained under the Goodness Gardens Food Safety & Quality Management System and the PrimusGFS audit scheme. It must be reviewed at least annually, after any deviation or audit finding, and whenever processes, products, or regulations change. Printed copies are uncontrolled.

1. Objective

Assess and mitigate food fraud (economically motivated adulteration) vulnerabilities.

2. Scope

All purchased product, packaging, and inputs.

3. Responsibilities

- FSQA Manager completes and reviews the assessment annually.

4. Procedure

- Each input is scored for fraud likelihood (history, supply chain complexity, price pressure) and detectability.
- High-vulnerability inputs get mitigation: trusted/approved suppliers, certificates of analysis, organic certificate verification, mass-balance checks.
- The assessment is reviewed annually and on supplier or market changes.

5. Records

- Food fraud vulnerability assessment; mitigation records.
