This controlled document is maintained under the Goodness Gardens Food Safety & Quality Management System and the PrimusGFS audit scheme. It must be reviewed at least annually, after any deviation or audit finding, and whenever processes, products, or regulations change. Printed copies are uncontrolled.

1. Objective

Emergency preparedness plan for the Indiana facility.

2. Scope

All emergencies affecting food safety or business continuity at the IN site: fire, severe weather/tornado, power loss, water loss, refrigeration failure, security events.

3. Responsibilities

- Site manager is emergency coordinator; FSQA assesses product impact.

4. Procedure

- Emergency contacts and utility shutoffs are posted; employees trained at hire.
- Tornado: move to designated shelter areas; account for all personnel.
- Power/refrigeration failure: record cooler temperatures hourly; product time/temperature assessed by QA before release.
- Water loss or boil notice: stop production; assess product contact water use before restart.
- After any event, inspect the facility (GMP walkthrough) and document product disposition before resuming.
- Annual drill documented per 1.07.08.

5. Records

- Drill records; event reports; product disposition records.
