This controlled document is maintained under the Goodness Gardens Food Safety & Quality Management System and the PrimusGFS audit scheme. It must be reviewed at least annually, after any deviation or audit finding, and whenever processes, products, or regulations change. Printed copies are uncontrolled.

1. Objective

Control agronomic inputs (fertilizers, soil amendments, crop protection) for food safety and organic integrity.

2. Scope

All inputs applied to GG crops.

3. Responsibilities

- Grower/greenhouse manager maintains input records; FSQA approves materials.

4. Procedure

- Only approved inputs are used; organic operations use OMRI/NOP-allowed materials with documentation.
- No raw manure on covered crops; composted amendments require process verification certificates.
- Applications recorded: date, material, lot, rate, area, applicator; pre-harvest intervals observed.
- Pesticide applications only by/under licensed applicators with WPS-compliant training, PPE, and posting (see GG-SAF-006).
- Storage: segregated, labeled, locked, with secondary containment.

5. Records

- Input application logs (Master Growing Inputs workbook); approvals; applicator licenses.
