This controlled document is maintained under the Goodness Gardens Food Safety & Quality Management System and the PrimusGFS audit scheme. It must be reviewed at least annually, after any deviation or audit finding, and whenever processes, products, or regulations change. Printed copies are uncontrolled.

1. Objective

Manage agricultural water (production and postharvest) to protect produce safety.

2. Scope

All water contacting crops, harvest tools, or hands at growing operations.

3. Responsibilities

- FSQA sets testing schedule; site managers maintain systems.

4. Procedure

- Water system description and map maintained for each site (source, distribution, treatment).
- Production water (hydroponic/irrigation/misting): annual system inspection + microbiological testing per schedule (5.16.01-W); generic E. coli criteria applied per FSMA Subpart E.
- Postharvest/wash water: potable source, sanitizer maintained and recorded (chlorine/PAA per label), strength checked at start-up and intervals.
- Failed tests: stop use, assess product impact, correct (shock/treat/repair), retest before return to service - document as a deviation with CAPA.
- Backflow prevention on hose connections; hoses off the floor.

5. Records

- Water system maps; test results; sanitizer logs; corrective actions.
